

Contract to SIHOT.PMS

Dear Ladies and Gentlemen,

paragraph 88 of the financial law 2016 in France, Europe, requires every software provider managing payments to comply with the ISCA-principles:

- **I**nalterability
- **S**ecurity
- **C**onservation
- **A**rchiving

SIHOT follows these principles already. In addition, we were successfully audited by our partner fiskaltrust.fr as part of the [statutory fiscalisation process](#).

We'd like to inform you about the further procedure on how to comply with the law while working with SIHOT.PMS.

When you purchase the SIHOT module „Fiscalisation“, you obtain the following [products](#):

- fiskaltrust.ChaîneCloud
The ChaîneCloud provides the required electronic signature of bills. The digital signatures are chained by checksums, whereby different document types follow separate chains.
- fiskaltrust.ArchiveAuditable
This archive records and archives the relevant tax documents (including bills, invoice copies, receipts, etc.) in a tamper-proof environment.
From this archive, relevant data can be made available in the event of an audit by the French administration

To help you get started, we offer a special service package that includes installation and activation in SIHOT.PMS as well as adjustment of your invoice layouts. This package is available for a one-time payment of € 250,00 only

Please follow this link to register in the fiskaltrust.fr portal free of charge.

Please do not hesitate to contact us, should you require any further information or assistance
